PostgreSQL  
MongoDB  
Firebase  
Knex.js  
Netlify  
Heroku  
Websockets  
Mobile  
Agile, Scrum

## EXPERIENCE

### Full Stack Developer

NorthOne, Inc., Aug 2019 - Dec 2019

- Developed web and mobile banking applications (iOS, Android). Responsible for maintenance, bug fixes, continuous improvements and feature development.
- Created and published regular releases which had immediate impact on both user experience and application stability.
- Collaborated with product, design, QA, and rest of the engineering team
- Technologies used: React, React-Native, TypeScript, Redux, Bitbucket, JIRA

### Equipment & Logistics Tech

The Michener Institute, Sept 2017 - Dec 2019

- Set up course equipment in accordance with Heart & Stroke Foundation guidelines
- Provide equipment and admin support and recording of student performances

### Online Banking Specialist

ATB Financial, Aug 2008 - Aug 2016

- Started with customer service and progressed through more senior roles including risk management and fraud detection, and online banking specialist
- Supported corporate accounts with business transactions
- Assisted retail and business customers with online banking set-up & troubleshooting

### IT Intern

World Health Organization (W.H.O.), Summer 2012

- Generated a SharePoint worksite for finance and procurement management
- Updated contracts and maintained Excel database with analyzed documents
- Organized and facilitated intern group workshops and seminars

## PROJECTS

### BridgeBot

A Slackbot application with a backend server that interacts with Slack API and Firebase, and a front-end web app that takes in information and presents results in visually-friendly charts. Technologies: React, Redux, NodeJs, Express, Firestore, Slack API

### Web and Mobile banking applications

NorthOne web and mobile (Android and iOS) banking app catered to make small businesses, free-lancers, or sole proprietors bank easier. Used: React-Native, Redux, React, TypeScript, Bitbucket, JIRA

### Gamebox

A social platform that hosts party games to play with friends. Users join a game by putting in a room code generated by the host. Tech used: Node.js, Express.js, PostgreSQL, React, Socket.io

### Chatty App

A chat messenger application built in React and WebSockets. Tech used: Express, Node, React, WebSockets, Webpack

### Tweeter

A Twitter clone, uses AJAX, Express, jQuery, MongoDB, Node, SASS

### TinyURL

A full stack web app that shortens long URLs (a la bit.ly). Used Express, Node

### Clippit

A resource wall where users can share, like, and rate resources. Used JavaScript, Express, Node, jQuery, PostgreSQL, Bootstrap, Knex.js, Git
